KOREA 's KTX

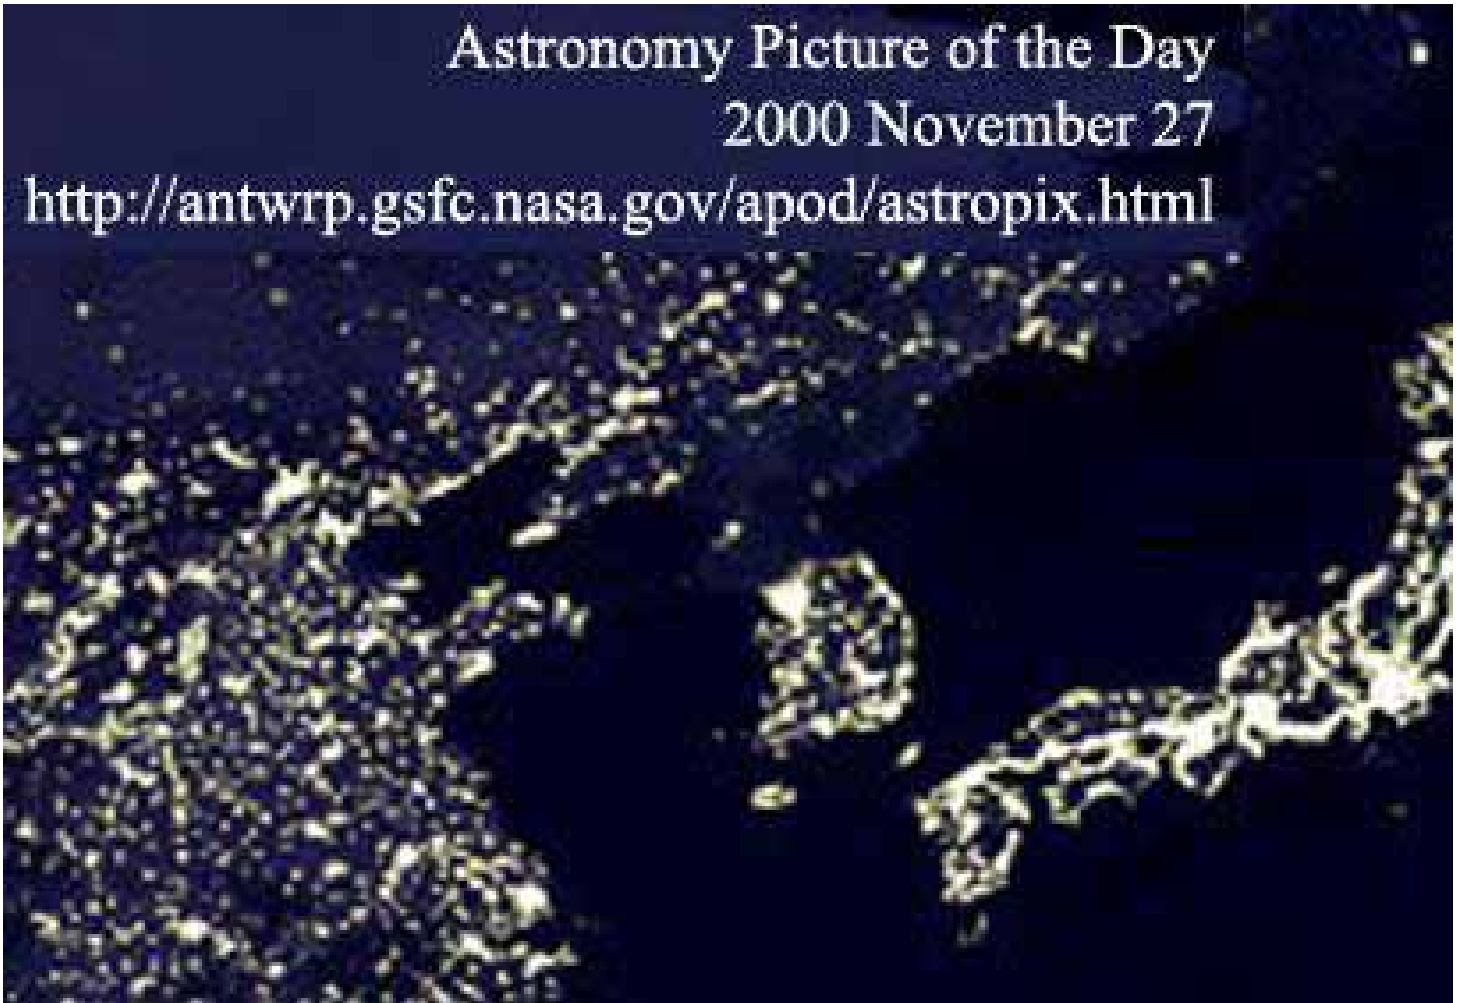

Korea Train eXpress (KTX) is South Korea's high-speed rail system. It is operated by Korail and is largely based on the French TGV system, and has a top speed of 350 km/h, limited to regular service for safety. On December 16, 2004, the Korean-made HSR-350x achieved a top speed of 352.4 kilometers per hour.

(Korea Train Express) is high speed train. KTX top speed is 220mph or 352.4 Ki

What did Korea Mean?

**Stopped the crawl of Communism
to S. Korea, to Japan
and elsewhere in SE Asia.**

**Helped to initiate the failure of
Communism throughout Eastern
Europe and in Russia.**

**Created a brilliant comparison
between the control of Communism
and the Freedom that
one has in a Republic.**

**Created a brilliant South Korea
both economically and politically.**

**Drove the first nail in the coffin
of Communism.**

**Korean War and
Service Veterans
Association of
Lake County,
Chapter 169**

**Tell America
Program**
